

VSM

VIA Site Management

VIA Site Management (VSM) is a software application that allows an administrator to manage, monitor and make changes to all connected VIA Collage, VIA Connect PRO or VIA Campus gateways

FEATURES

- VIA Gateway Management - Adds, removes, renames and groups gateways
- Gateway Configuration - Sets default settings and features to all VIA gateways
- Status Update - Identifies ON/OFF status of VIA gateways and firmware version running
- Health Checking - Monitors the CPU usage and HDD level of each gateway
- Push Updating - Pushes new firmware updates to the configured gateways
- Free Demo - VSM is free for demo purposes (up to 3 devices to manage)

CONFIGURATIONS

VSM-UNLTD	VIA Site Management License - unlimited VIA gateways
