

## CP-MH1/MH1/xl

15-pin HD, 3.5mm Stereo Audio & 3 RCA  
Hydra™ Multi-Head Cable - Plenum Rated

| VGA/UXGA - 15-pin HD

Kramer's CP-MH1/MH1/xl Hydra multi-headed cable offers the highest possible performance and the features most requested by installers and users. The Hydra MH1 configuration is ideal for any application requiring a cost-effective, one piece cable solution for the signals most often found in AV equipped rooms today

### FEATURES

**Quality Construction** - Kramer's unique hybrid construction, using molded and back shell connectors

**Plenum Rating** - CP versions of Multi-Head are constructed from CL2P and CMP rated cable containing six high-resolution mini coaxes and 2 shielded pairs

**Connectors** - Slim connectors with shallow depth profile are top priority in the new XL generation. At the same time, aesthetics are even nicer than before, using elegant, molded connectors at one end where it is typically connected to a projector, and an extra shallow 45° VGA connector with removable metal shells is used at the other end to provide all possible options for installation in tight quarters

**Flexible Applications** - Use the 15-pin HD, 3.5mm stereo, and 3 RCAs for any combination of VGA, video and audio signals. The mini connector may also support remote control in some cases. The RCAs are typically used for composite video and L/R audio, but can be used for analog component video

**Companion Wall Plate** - Designed as the perfect fit with the WAV-5 wall plate

**Varied Selection of Lengths** - Available in versions of 6 to 150ft (1.8 to 45.7m)

**Cable Specs** - For detailed specs, see Kramer BCP-6X2T bulk cable. Note that the 15-pin HD portion only passes RGBHV, so there is no ID/DDC support

### CONFIGURATIONS

CP-MH1/MH1/XL-15 15-pin HD, 3.5mm Audio & 3 RCA Molded (Straight) to Backshell (45°)

CP-MH1/MH1/XL-50 15-pin HD, 3.5mm Audio & 3 RCA Molded (Straight) to Backshell (45°)
