

KRAMER

Kramer Network

Enterprise Management Platform

KRAMER
NETWORK **2.2**

Kramer Network is an enterprise management platform that lets IT and AV professionals easily deploy, configure and manage an entire Pro AV installation from anywhere in the network, including Dante™ and 3rd party devices

FEATURES

Simple and Intuitive AV Routing - Complete centralized or distributed routing of virtual and / or physical matrixes

Quick and Efficient Device Management - With instant auto detect, status update, and configuration for any Kramer or Dante IP device on the network

Easily Trackable Device Firmware Management - Manage all FW versions, automatically receive new version notifications and execute updates from a centralized location with one click

Enhanced Security - With LDAP user authentication and advanced user management, enabling you to create different levels of access for different users

Simple and Powerful Maestro Room Automation - Intuitive user interface enables you to fully automate your meeting room elements. Configure lights, shades, devices and more to be activated by an extensive range of triggers, including scheduling, input/output connectivity, routing, and button pressing. By minimizing user intervention, Maestro room automation saves meeting prep time and minimizes human error before presentations

Detailed Site Topology - Easily drill down to visually examine a specific location

Convenient Video Preview - View live video from connected displays, right from the Kramer Network interface

Device Scan Across Subnets - Scan and discover devices across different subnets

Intuitive Video Wall Management - Select the monitor configuration that fits your requirements. Click the Identify button to display the position number of each video wall screen as an overlay on that screen

Kramer Control Integration - Send Kramer Network commands from Kramer Control to trigger Maestro room automation actions, for example, to activate scenarios

Live Alert and Response - Proactive notifications such as email and SNMP traps keep you informed of issues in your system

Fully Customizable Scripts - Increase the functionality of your system by creating custom scripts in almost any language to provide for the specific needs of a project

Constant System Optimization and Improvement - All system events are recorded in the logs, enabling reports to be generated to analyze past usability and plan future adaptation and optimization

Fast Initial Setup - Install and start using the platform in minutes with no need for programming

Integrated Room Scheduling and Management - synchronized with your Outlook

Multi-lingual Support
