VIAware

Wireless Presentation & Collaboration as a Software-Only Solution

All the advanced wireless presentation and collaboration tools offered by VIA Campus can now be used on your own PC to enhance collaborative meetings in Corporate environments and interactive learning in Education and training environments. VIAware can show up to six user screens on one main display or up to 12 screens on two displays (hardware-dependent) and features iOS mirroring for MacBook, iPad, and iPhone as well as native mirroring for Chromebook, Android, and Windows phone. Remote students can easily join the class and collaborate in real time with embedded 3rd-party video conferencing and office apps. VIAware delivers the same security offered by all VIA devices and can be installed on any computer running Windows 10 64 bit OS, providing IT managers the versatility they need. The software works seamlessly with your existing VIA clients and VIA Site Management and offers full support for all VIA Quick Connect features, such as QR Code, NFC Tag and VIA Pad. VIAware is available as a one-time license with optional annual upgrade subscriptions or as a recurring annual subscription

FEATURES

Windows 10, 64 Bit Operating System Support - Windows 10 license not provided

Easy and Effective Wireless Connectivity - Built-in Wi-Fi* gives you two setup options for enabling meeting participants to wirelessly join the meeting. After setting a wired connection from your PC running VIAware to your local corporate LAN you can do one of the following: use the built-in PC Wi-Fi* to create a guest network to which participants can connect or use the built-in PC Wi-Fi* as a Miracast receiver

60fps Streaming Multimedia - Share up to 4K wireless video streaming (using the VIA app Multimedia feature)

iOS, Android, Chromebook® and Miracast® Mirroring

Optimized for Video Conferencing - VIA Versa feature enables you to wirelessly select the professional grade camera and AV in your meeting room for your VC calls

Seamless Live Video Streaming - Stream live content from meeting rooms, classrooms and studios using RTMP/RTMPS to all the leading platforms, like YouTube™, Kaltura™, Panopto™ and more

Room Calendar Integration - Shows the room occupancy schedule on the main display

Internal Web Browser - Open any browser to display content

Streaming Input for the Internal Media Player

File Sharing - Drag and drop files to the internal PC storage*

Whiteboard Support

Control - Give a participant control over a presenter's PC for true collaboration

Chat - Send an instant message to another user

iCloud®, DropBox®, Google Drive®, OneDrive® Integration

View Main Display - View the main display on your own device

Third-Party App Support - Like Microsoft Office®, Teams®, SkypeforBusiness®, Zoom®, GoToMeeting®, and WebEx®

Icon Shortcuts - On the splash page for 3rd party applications

Integrated YouTube Player - Create playlists, share videos or drag and drop any YouTube clip to your VIA app for seamless video playback

Recording - Record an entire VIA video and audio session to a local video file

Digital Signage - Enables you to display dynamic content and information on the main display when there is no meeting in progress. Use a predefined template or create your own display configuration with up to three frames of content that appear simultaneously. Schedule campaigns (content configurations) to run automatically at specific dates and times

Seamless VSM Integration - With VIA Site Management (VSM) software
